4 sources, as-of dates

How to read this
counts = rows in the backing dataset (13 drugs, 2026-11-05)
many : 1 = a foreign key on the 'many' side
many : many = a link dataset (ontology_link_*)
plain lines: links have no direction

Open item
a duplicate Signal → Drug link
was added by mistake (step 11);
unused: delete it
