
Part 1 · As the safety officer (Workshop module MSSM Safety Officer) · question 1
1 · Morning brief
1,073 ranked · 126 active recalls
26 changes in 30 days
+ as-of date per source
2 · Page 1 Not in label
drug filter: semaglutide
→ NAION is rank 1
3 · Signal record
why flagged: a = 394, PRR 112.5
0 mentions in 3 reference labels
trace to source
4 · Triage this signal
Action: subject + evaluation id
locked; officer picks decision,
writes a rationale
5 · Decision saved
MSSM Triage Decision object
reviewer + time set by system
survives a rebuild
Part 1 (cont.) · questions 2 and 3
6 · Page 2 Recalls
active · class · linked drug
detail panel + openFDA record
7 · Page 3 What changed
start date = since my last review
label versions · recalls · signals
Part 2 · Under the hood: how the data gets there
8 · Data Lineage
raw → clean → curated graph
identity resolved once
Architecture
9 · Code Repositories
pipelines_raw_ingest · pipelines_clean
ontology_signals.py · incr. FAERS
Architecture · Optimization
10 · A dataset + SQL
ontology_signal_signals
counts and key checks
Data judgment
11 · Ontology Manager
10 MSSM object types, link types
the create-only Action
Architecture
Part 3 · Under the hood: objects, AI and monitoring
12 · Object Explorer
Signal → AE Stat → Drug
the saved Triage Decision
Application · trust
13 · AIP model + AI dataset
Claude Sonnet 5.5 · exact quotes
from_cache · 448 / 448 grounded
AI reliability · Optimization (O1)
14 · Monitoring
monitoring_checks (21 per build)
monitoring_drift (replay)
Health tab: 4 Data Health checks
Last line in each stop = rubric row it supports
(a suggestion; the demo director, C6, sets the final
order, timing and words)
